Jaya Surya Kaneganti

Power BI Developer

Hyderabad, India | +91 63038 12441 | Suryakaneganti@gmail.com | linkedin.com/in/jaya-surya-kaneganti-93420324a

PROFESSIONAL SUMMARY

Power BI Developer with 6+ years of experience building semantic models, Data Analysis Expressions (DAX) measures and dashboards on SAP Enterprise Resource Planning (ERP), SQL Server and SharePoint data. Cut dataset refresh time from 25 to 6 minutes, implemented incremental refresh and Row-Level Security (RLS), and replaced 40+ manual monthly reports for 300+ users across 3 plants. Skilled in Power BI Service administration, Power Automate and Azure Data Factory.

CORE COMPETENCIES

- Power BI Desktop & Service
- DAX Measures & Calculations
- Row-Level Security (RLS)
- Performance Tuning (DAX Studio)
- Data Validation & Reconciliation
- SAP Integration (Azure Data Factory)
- Semantic Modeling
- Power Query (M)
- Incremental & Scheduled Refresh
- Workspace & Gateway Management
- Key Performance Indicators (KPIs)
- Microsoft Fabric (Working Knowledge)
- Star Schema Data Modeling
- Structured Query Language (SQL)
- Refresh Troubleshooting
- Power Automate
- Data Visualization & Storytelling

PROFESSIONAL EXPERIENCE

Data Analyst | Somany Impressa Group, Hyderabad **Aug 2023 – Present**

- Developed 25+ Power BI dashboards and semantic models for production, costing, procurement, sales and finance, improving visibility for 300+ users across 3 plants.
- Replaced 40+ manual monthly Management Information System (MIS) reports (Sales, ORM, PPC and Profit and Loss (P&L)) with automated reporting, saving about 40 minutes of manual work per user each week.
- Reduced dataset refresh time by 76% (25 to 6 minutes), configured incremental refresh and tuned DAX with DAX Studio and Performance Analyzer for faster reports.
- Integrated 3 data sources (SAP, SQL Server and SharePoint) through SQL, Power Query and Azure Data Factory into Extract, Transform, Load (ETL) workflows for real-time insights.
- Validated and reconciled Power BI figures against SAP source data for reports and automated inventory, production and sales variance analysis, ensuring accurate numbers before release.
- Implemented RLS and managed workspaces, gateways and access for workspaces / users, restricting each team to its authorized data.
- Built Power Automate flows to what they automate, result, e.g. time saved.
- Ran User Acceptance Testing (UAT) with Finance, Production and Supply Chain teams and wrote documentation and user guides for # dashboards, supporting adoption by business users.

Associate Software Engineer | Tech Array Solutions (deployed at Tech Mahindra) **Feb 2020 – Apr 2023**

- Designed Power BI dashboards with SQL tracking sales, revenue, conversion rates and customer trends across 220+ Peavey Canada retail stores, helping teams spot sales opportunities.
- Translated requirements from 3 business units (finance, procurement and manufacturing) into tailored reports, improving reporting efficiency and stakeholder satisfaction.

KEY PROJECT

Financial Reporting & Analytics Automation | AGI glaspac & Hindware

- Automated 20+ Power BI dashboards for accounts payable, receivables, P&L, procurement and cost analysis, reducing manual reporting effort by 60%.
- Optimized DAX measures and data models for 2 businesses, improving financial transparency and decision-making.

EDUCATION

Bachelor's Degree, Mechanical Engineering **May 2014 – May 2018**

Avanthi Institute of Engineering and Technology, affiliated to Jawaharlal Nehru Technological University, Kakinada (JNTUK), Visakhapatnam | 66.70%

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300) | Microsoft **2025**
